Professional Summary

Generative AI Engineer with expertise in Python, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI Agents, Machine Learning, and Backend Development. Experienced in developing AI-powered applications using LangChain, FastAPI, vector databases, and modern LLM APIs. GATE 2026 Qualified with industry experience through IBM internships.

Technical Skills

Programming Languages: Python, C++, SQL, JavaScript

Generative AI: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, AI Agents, LangChain, LangGraph, CrewAI, Transformers, Embeddings, Semantic Search, Vector Databases, FAISS, ChromaDB, OpenAI API, Groq API, Llama, Gemini

Machine Learning: Scikit-Learn, TensorFlow, PyTorch, Pandas, NumPy, NLTK, Natural Language Processing (NLP), Feature Engineering, Model Evaluation

Backend Development: FastAPI, REST APIs, Streamlit

Databases: SQL, MySQL

Experience

IBM SkillsBuild

Jun 2025 – Jul 2025

Web Development Intern

Remote

- Developed a responsive e-commerce web application using **ReactJS**, JavaScript, HTML5, and CSS3 following modern frontend development practices.
- Designed reusable UI components and integrated RESTful APIs to improve application scalability and maintainability.
- Implemented responsive web interfaces optimized for cross-browser compatibility and mobile devices.

IBM SkillsBuild

May 2024 – Jun 2024

Data Analytics Intern

Remote

- Performed data preprocessing, cleaning, and transformation on structured datasets using **Python** and **SQL**.
- Developed optimized SQL queries for data extraction, aggregation, reporting, and business intelligence.
- Conducted Exploratory Data Analysis (EDA) to identify trends, correlations, and actionable business insights.
- Worked with relational databases and implemented query optimization techniques for improved performance.

Projects

Enterprise RAG Assistant | *Python, FastAPI, LangChain, FAISS, Groq API*

- Designed and developed a production-grade Retrieval-Augmented Generation (RAG) application enabling intelligent question answering over enterprise documents.
- Integrated LangChain with FAISS vector database to perform semantic search using embedding-based document retrieval.
- Implemented an automated document ingestion pipeline supporting PDF, DOCX, and TXT files with chunking and embedding generation.
- Built scalable RESTful APIs using FastAPI and integrated Groq-powered Llama models for low-latency inference.
- Enhanced response accuracy using prompt engineering, retrieval optimization, and conversational memory.

AI Resume Analyzer | *Python, Streamlit, Sentence Transformers, Gemini API*

- Developed an AI-powered ATS Resume Analyzer that evaluates resumes against job descriptions using semantic similarity and natural language processing.
- Implemented keyword extraction, missing-skill detection, ATS scoring, and personalized resume improvement recommendations.
- Integrated Large Language Models (LLMs) to generate recruiter-style feedback and actionable optimization suggestions.
- Built an interactive Streamlit dashboard for resume upload, job matching, and visual performance reports.

Agentic AI Research Assistant | *Python, CrewAI, LangGraph, Tavily*

- Designed an Agentic AI workflow consisting of Planner, Researcher, Writer, and Reviewer agents for automated research report generation.
- Implemented autonomous task planning, multi-agent collaboration, memory management, and iterative reasoning using CrewAI and LangGraph.
- Integrated external search APIs to retrieve recent technical information and generate citation-supported reports.
- Optimized agent coordination to improve response quality and execution efficiency across complex research tasks.

Education

Guru Gobind Singh Indraprastha University, New Delhi

Dec 2022 – June 2026

Bachelor of Technology in Artificial Intelligence & Data Science

CGPA: 8.05/10
